"We are launching things"

Welcome

Born from passion and crafted in over **10** years, driven by performance and innovation.

Our Services

Hosting

Shared or dedicated hosting on VPS located in Europe with SSD storage

Software

Developing new solutions or doing optimizations for your software

Consultancy

Building a strategy based on your needs

Hardware

From workstations upgrade to complete network solutions

Our Services

Hosting

Shared or dedicated services located in Europe using VPS with SSD storage. Based on OVH infrastructure.

Amazon AWS, Google Cloud or Microsoft Azure available also.

> Shared, dedicated, bare metal. You name it. Everything in a near datacenter for low latency.

> Webmin / Virtualmin control panel.

> Backup included (best-effort). Backup+ available as an additional service (full daily backups).

> OVH is a French cloud computing company that owns the world's largest datacenter in surface area. They are the largest hosting provider in Europe and the third largest in the world based on physical servers.

> OVH offers the most powerful anti-DDoS solution on the market with a capacity up to 11Tb/s.

> 99.95% Availability (SLA) — based on OVH's network.

Software

Developing new solutions or doing optimizations for your software. From content management systems to online shops and web applications.

> Blogs, online shops or portals using the user-friendly WordPress or custom designed platforms to accommodate all your needs.

> Software development using modern technologies and following good practices from the industry.

> Web applications for data collecting, processing to improve services or discover new opportunities.

> Optimizing your current solution to improve the performance and user experience.

Our Services

Consultancy

Building a strategy based on your needs.

> Online presence: SEO, audit, performance benchmarking.

> Assessing your needs and choosing the right provider.

> Selecting the best suited hardware to work efficiently.

> Blending everything to get the correct recipe.

Our Services

Hardware

If you can touch it, then it's hardware and we can take care of it. From workstations upgrades to complete network solutions. On premise file servers, backup solutions, VPNs etc. — everything you need to improve your workflow and boost your efficiency.

› On premise servers, file servers, backup solutions to accelerate and protect your data.

› Routers, firewalls and VPN setups to protect your network and enable secure remote access.

› Workstations design and upgrade.

› Phone systems, AVRs, VoIP.
